

The Eastern Oregon Regional Airport and the City of Pendleton strongly support continued commercial air service between Pendleton and Portland with consideration to other hubs as well.

The City has been contacted by both Horizon Air and Big Sky Airlines regarding the EAS RFP and providing subsidized service for Pendleton. The majority of the community eagerly awaits the content of those submissions with a keen view to schedule and fare prices.

Both Airlines are highly regarded within the community and service by either or both will be supported.

Additional letters of support will be forthcoming once the content of the proposals can be shared with the community.

Sincerely,

Larry Dalrymple
Airport Manager
